

Structured Media Networked Home Package

The Networked Home Package combines all the elements you need for a modern home wiring system in your residence. The package combines multi-line phone/fax/internet (It can handle standard and high-speed internet access such as DSL, cable modem and ISDN.) and data networking with distribution of a variety of video signals throughout the home, including cable and satellite TV, digital cable, antenna, VCR, DVD, security camera/CCTV and more.

Audio/video and CAT 5 voice/data jacks are located in the room's wallplate to provide access to incoming utility services. The Structured Media Center distribution enclosure can be upgraded with other voice-data-audio-video modules as your networking, home entertainment and home office technology needs change.

Advanced Home Office Package Components:

- **Structured Media Center Enclosure**

A whole-house media enclosure for distribution and management of communication and entertainment technologies

- **12 Port Structured Media (PTE) Panel**

Provides multi-line fax/phone/internet access (handles 4 lines to 19 locations) and full-home networking. (Provides system override dialing capability. Activation is optional.)

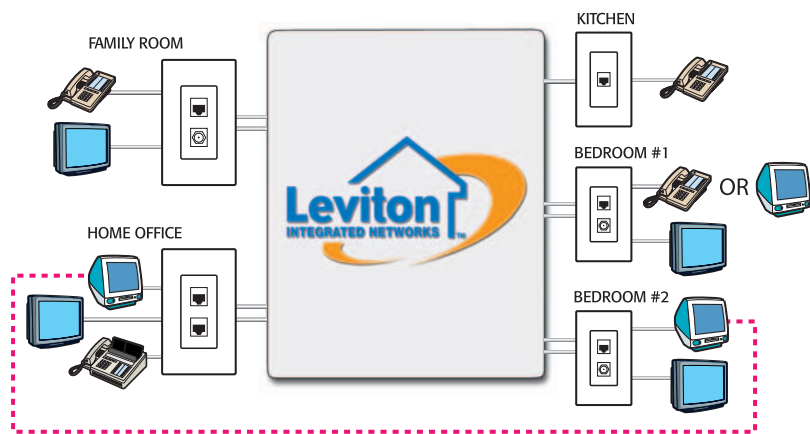

- **Home Networking Switch**

Provides five 10/100 BaseT ethernet ports for access to shared data between computers, printers, scanners and other devices

- **AC Power/Surge Module**

Supplies power and electrical surge protection to your distribution modules

STRUCTURED MEDIA CENTER

- **Room Wallplate Outlets**

Designer-styled QuickPort wallplates match style and color of other electrical outlets

The QuickPort snap-in CAT 5 and F-connector modules provide high-performance connections for computer, fax machines, telephones and TV's

Advanced Home Office Package Components

If more room outlets are needed, please contact your builder or contractor for additional information
